

Mountaineering Kit List

	Mountaineering Kit	g	Notes
General	2 Binoculars	700	Very useful for route spotting - one on hill, one at base
	3 ropes, 2x 50m, 1x 60m	11200	
	30m tat	800	
	4 x Pair Climbing Axes	4985	
	4x Walking axe	1763	Taken for emergency use, but most useful for digging toilet trenches
Each person carried	belay device HMS Belay carabiner sling (120cm) sling (60cm) 2 Prussik loops 3 screwgates		Carrying all of this on our person allowed for rapid abseils and changing from moving together to pitching, especially if a belay was constructed before the rack
Each 2.5kg Rack had	nuts 4 hexes quickdraws (4) sling draws (2) 120 slings and gates (4) 240 cm sling nut key 2 screwgates 1 HMS screw		We generally carried half a set between four. Some General notes: The rack was a good size, and although we rarely carried it all, the routes had less rock The third base camp rack was taken partly for spares as we We had too much climbing kit for our routes, but as we were
In addition:	10 ice screws	1500	Shared between racks in whatever way we thought we'd need them. These were really useful, and the most used part of the rack for one team.
Total		28kg	3.55kg per person
